

**SECURITY AND COMPLIANCE**  
**SECURITY & COMPLIANCE**

We stand side by side with our customers during all stages required to develop and define their security strategy in terms of complete design and tuning redesign, from the strategy setting and design to the operative implementation.

**CLIENT**

SARA  
ASSICURAZIONI

**PROJECT  
NAME**

Datamasking

**CHALLENGE**

One of the main tasks to achieve GDPR compliance is the protection of personal and sensitive information (PII) in non-production environments.

**WHAT WE DID**

Using Oracle native DataMasking capabilities, we defined and implemented a deterministic masking process based on consistent clusters of master data information

**BENEFITS**

As a result of masking, all Sara Assicurazioni development teams can implement new functionality in a completely secure manner and with data that is syntactically consistent with the production data but semantically different.

**SECURITY AND COMPLIANCE**  
**SECURITY & COMPLIANCE**

We stand side by side with our customers during all stages required to develop and define their security strategy in terms of complete design and tuning redesign, from the strategy setting and design to the operative implementation.

**CLIENT**

MANUFACTURING  
COMPANY  
(UNDER NDA)

**PROJECT  
NAME**

IT governance  
risk &  
compliance

**CHALLENGE**

Monitoring and controlling security risks across the entire on-premise infrastructure.

**WHAT WE DID**

We implemented the NIST Risk Management Framework by conducting a GDPR assessment and performing a series of vulnerability assessments and penetration tests of the entire on-premises and cloud infrastructure. We then activated the Vulnerability Management Project to continuously remediate vulnerabilities found in the periodic assessment cycles.

**BENEFITS**

Ensuring corporate security control processes are in place.  
Providing evidence to customers of risk reduction procedures and activities performed.  
Providing cyber risk control tools and assets.  
Increasing the customer security posture.
